Zamość is a special city, not only the pearl of Renaissance architecture, but also the mirror of Polish fate. I am glad that College of Management and Public Administration in Zamość is trying to continue the rich tradition of the famous Zamość Academy.

President of Republic of Poland
Lech Wałęsa
Zamość, July 1st, 2000

Here, the blue sky, green forests and fields and silver lakes and rivers speak with extraordinary force. Here, bird songs sound especially familiar, in Polish.... The beauty of this land makes me call for it to be saved for future generations.

The Pope
John Paul II
Zamość, July 12th, 1999
Zamość University of Management and Administration is a non-state university operating under the Act on Schools of Higher Education. It was founded on the 13th of August 1997 and it entered in the Ministry of National Education Register at number 128.

- The founder of the University is SPP INNOWACJE Ltd in Rzeszów.
- The University is managed in accordance with the quality standard ISO 9001:2000. The certificate was awarded by a Dutch company KEMA Quality B. V.
- Zamość University of Management and Administration has promoted over 10 thousands of graduates who obtained Bachelor's degree, Master's degree and postgraduate degree. For many years the university maintains leading position among non state universities in Lubelskie Region.

Thanks to opinion of employers and graduates, Zamość University of Management and Administration ranked the first place in the country in the category of 'the best University with a Bachelor's degree' in the ranking provided by the economic magazine 'Home & Market', the university also ranked the second place in Lubelskie Region in the ranking of 'Newsweek'.

Zamość University of Management and Administration, University of Management and Information Technology in Rzeszow and Tischner European University belong to education consortium of South East Poland.
Economic research

Zamość University of Management and Administration has conducted business tendency surveys on Lubelskie Voivodship since 2001. The effect of economic research conducted by the University for the business cycle in the region of Lubelskie, and the implementation of the project EQUAL „Unemployment prevention system in underdeveloped areas” is the e-barometer.

Surveys were conducted with using econometric and artificial intelligence methods (neural networks, Bayesian Networks), CBR (case base reasoning) methodology.

E-barometer is an online tool which gives companies access to information about the risks of micro and macroeconomic level. In accordance with the concept of the portal, each of the companies after logging and put in the relevant financial data to the system obtain information concerning:

- Forecasts of microeconomics level, generated on the basis of the functioning: the system of the benchmark (benchmarking system enabled employers to compare their economic and financial standings with average standings estimated in the sector they are operating), calculator of risks (forecast of the company's situation on the basis of economic and financial data entered into the system).
- Forecasts at the macroeconomic level (regional level) based on: the economic barometer, consumer downturn forecasts, labor market forecast available in the form of reports.
### University as a scientific unit

| Zamość University of Management and Administration is the only none-public university in the country training students in the Faculty of Physiotherapy which has its own scientific research database under the name: NZOZ Rehabilitation Centre. The Centre includes: specialist rehabilitation clinic, daily rehabilitation center, kinesitherapy laboratory, physiotherapy laboratory, rehabilitation centre, hydrotherapy laboratory, medicinal laboratory, therapeutic massages laboratory, occupational therapy laboratory. | **Implementation and service systems**
Zamość University of Management and Administration is a trading partner in the area of supply, implementation and servicing of the company's KAMSOFT IT products leading Poland's producer of software for health care organizational units. Implementation and maintenance services carried out by us, according to the procedures and corporate business KAMSOFT methodology PRINCE2TM, ensure high quality and low costs. |

### Rehabilitation Center tasks:
- teaching
- business and scientific research
- rehabilitation services

In the Rehabilitation Centre physiotherapy students (at bachelor and master degree) participate in exercises and practical working. Scientific research is conducted by scientific staff including: professors, lecturers and assistants from the Faculty of Physiotherapy ZUMA, while using specialist diagnostic equipment. Highly qualified personnel and premises facilities also enable to provide versatile rehabilitation services for patients. There is also possibility of enjoying the right to consultative advice of professors, specialists in the field of rehabilitation, orthopedics, neurosurgery, specialists recognized as authorities in Poland and in the world, who are also ZUMA's staff.

### IT training
We prefer workshops as a method of training. The main purpose of training is theoretical acquisition of knowledge as well as practical skills of the participants.

Services include:
- business process modeling
- analysis and design of information systems
- information systems services in the scope of health care protection
- operating systems and network administration
- databases administration
**University in international networks**

**ENPHE**

The European Network of Physiotherapy in Higher Education was founded in 1995 on the initiative of the Faculty of Physical Education and Physiotherapy in Catholic University in Leuven (Belgium) as an organization operating under the European Community. From the beginning of its activities, ENPHE organization is apolitical and non-profit, it joins universities and physiotherapeutic institutions.

The main purpose of ENPHE is cooperation, exchange of experience and implementation of new ideas related to physiotherapy in higher education. The objective of all ENPHE activities is to provide education and physiotherapeutic practice the European dimension. From students' point of view very important are opportunities given by Youth European Association of Physiotherapy (YEAP - www.yeap.z.pl). Among main opportunities it can be listed: assistance in the realization and promotion of student activities, support of international exchange of physiotherapy students.

**BUSINET**

BUSINET - Network for the Development of Business Economic Education was founded in 1986 on the initiative of Katholieke Hogeschool in Leuven (Belgium) in order to create European teaching programmes in business and promote new opportunities for European institutions which represent higher education, teaching staff and students.

### The main purpose of Businet

- assistance for students from member organizations in gaining international experience through student exchange,
- assistance in the development of teaching staff career,
- the support of organization of the international projects,
- the improvement of professional skills of people who enter the European labour market.

Since 2001, Zamość University of Management and Administration has participated in the workshops and annual conferences of BUSINET. Thanks to this network it was possible to establish contacts and cooperation with many European universities (Belgium, Ireland, United Kingdom, Germany, Finland). BUSINET gives also a great opportunity for the development of students of economics knowledge by organizing an annual international conference.

**Zamość University of Management and Administration is the first Polish university admitted as a member of BUSINET.**
University in international networks

INFORMATION NETWORK EUROPE DIRECT

EUROPE DIRECT network is created by 273 information points in 27 countries of the European Union. Its main purpose is to provide information, advice, assistance and answers to questions concerning the institution of the European Union, its laws, policies, programs, assistance and the possibilities of applying for funding from EU funds for inhabitants of individual regions.

The network supports and inspires local and regional debate about the European Union and its policies, disseminates information materials published by the European institutions, cooperates with other institutions (which operate at regional, national and EU level) involved in informing the society about the European Union.

European Information Center "Europe Direct" operates at Zamość University of Management and Administration, provides services for both students and local communities in the Zamojskie region.

CIRET

The international scientific organization - Centre for Research on International Economic (Tendency) Surveys (CIRET) was created in 1952 by the Western European Research institutes, among which the most important role played IFO - Institut fur Wirtschaftsforschung in Munich, Institut National de la Statistique et des Etudes Economiques (INSEE) in Paris and the Instituto Nazionale per lo Studio della Congiuntura (ISCO) in Rome.

The aims of CIRET:

- supporting international development through the conducting and using the results of businesses and households surveys,
- initiating and developing cooperation between domestic and international institutions conducting economic surveys.

Among the various forms of activities, the most important event in the organization are congresses held every two years, which are a forum for the presentation of the most interesting research results, new methods and methodological solutions and the exchange of experiences resulted from the economic situation surveys.

During international conferences CIRET Zamość University of Management and Administration presents the results of economic situation surveys carried out by the university since 2001 within Lubelskie Province.
International certificates

CISCO NETWORKING ACADEMY

The university is Local CISCO Academy, owing this fact the university offers trainings from prestigious Cisco Systems Company for 20 - 30 percent. market value. Cisco Systems is a world leader in manufacturing network products for a wide range of applications, from small local networks to powerful corporate networks. Cisco devices make up the necessary worldwide infrastructure of companies, banks, universities, municipal services and government agencies. Cisco Networking Academy programme offers theoretical and practical knowledge in the field of design, development and maintenance of computer networks. Training prepares for exam CISCO Certified Networking Associate certification (CCNA), which is an international document confirming professional skills.

The certificate is recognized throughout the world, it confirms the high level of knowledge within the framework of technology solutions for Cisco Systems.

NOVELL ACADEMIC TRAINING PARTNER

The University is also the academic Novell Training Centre (Novell Academic Training Partner), which enables the implementation of authorized trainings of Novell company to teaching programme. Students gain specialist knowledge confirmed by the certificate of Novell training completion. This creates new opportunities and gives possibility of participation in Novell network administrator test - CNA.

EUROPEAN COMPUTER DRIVING LICENCE

ECDL certificate confirms that its holder can properly carry out basic computer tasks such as: texts editing, using a spreadsheet of computer network, databases, multimedia graphics. Computer Skills Certificate meets the requirements of employers because it is the uniform and objective measure of the skills of employed employees. This measure is completely independent of the place of gaining skills, completed courses or education. The certificate is accepted in all countries in Europe, it is issued in two languages (English, and the home country).

Zamość University of Management and Administration is a certified center, having rights for conducting examinations.

THE EUROPEAN LANGUAGE CERTIFICATES

TELC The European Language Certificates - the system of examinations created on the basis of Common European Framework of Reference for Language Learning and Teaching systems which includes: learning, teaching and testing of language competence based on the guiding principles of the Council of Europe. It was drawn up and it is administered by WBT (Weiterbildungs-Testsysteme GmbH) - non-profit organization which is a member of the Association of European Organizations which grant internationally recognized language certificates. WBT has 35- year- experience in designing and carrying out language examinations at the highest European level.

TELC certificate can be obtained after passing the exam, which checks language skills, it particularly places the emphasis on the communication skills. TELC Certificates have five levels of language proficiency and include nine European languages.

Students pass exams in English and German.
International cooperation

An integral part of a strategy of the Zamość University of Management and Administration is sustainable development and international cooperation which contributes to improvement of qualifications of academic staff as well as to gaining new skills and experiences by students and to improvement of teaching programmes. Zamość University of Management and Administration collaborates actively with universities within the framework of signed agreements with European partners. Zamość University of Management and Administration has received from the European Commission extended Erasmus University Charter for the period 2007 - 2013, which gives it possibility for sending people abroad for study, practice and exchange of experience not only of its students and teachers, but also administrative staff.

Currently, students have the opportunity to study in Belgium universities: Katholieke Hogeschool Kempen, Katholieke Hogeschool Leuven, Katholieke Hogeschool Mechelen, Katholieke Hogeschool Limburg, XIOS Hogeschool Limburg Hasselt as well as in other universities: North Karelia University of Applied Science in Joensuu (Finland) and Abant Izzet Abysal University (Turkey).

The university has experience in the implementation of other UE educational projects. Till 2008 exchange and internships were realized under the LEONARDO DA VINCI programme which allows students (of information technology, administration and pedagogy) gaining the first professional experience in innovative enterprises.

The university participates also in projects dedicated to young computer scientists from all Europe - called IP (Intensive Programme). In 2008 Zamość University of Management and Administration was a host institution of scientific project entitled 'Securing the digital world.' In projects have been involved educational partners such as: Katholieke Hogeschool Leuven, North Karelia University of Applied Sciences (NSKUAS) in Joensuu and institutions which adopted the 13-week internships for students ZUMA are: ASIST, CAPVIDIA, XIOS Hogeschool, Iniciativas Multimedia, Economic and Employment Centre of North Karelia (T&E Centre), ISAI Ltd.

Zamość - THE UNESCO WORLD HERITAGE CITY

Zamość-UNESCO World Heritage City, pearl of Renaissance architecture, the city awarded the title of one of the 7 Wonders of Poland. This is an example of one of the greatest 'ideal city' in Europe, based on Italian Renaissance town planning models. Great Market Square, located in the Old Town center, is one of the most beautiful sixteenth-century squares in Europe. Great Market Square is surrounded by rows of colored apartment houses with marvelous arcades. Thanks to them Zamość gained the nickname — 'city of arcades.' The market is dominated by 52-meter town hall tower, with wide staircase, which can be a mark of city.

www.unesco.org

Zamość vibrants with cultural life. This is a meeting place of people, cultures and religions. It is also a city with long academic tradition. The Zamojska Academy, which was the third university after universities in Krakow and Vilnius, existed for almost 200 years (1595-1784). Educational activities of the Zamojska Academy had influence on socio-economic and cultural development of its closest circle, Lubelskie Region and neighbouring areas of the Republic of Poland. In 1784 partitioner Austrian authorities liquidated the Academy and stopped its activities for 213 years.

Students of the Zamojska Academy appeared again in the city two centuries later after its closing by Austrians. The continuation of academic tradition of its famous predecessor started in Zamość University of Management and Administration. The university is the first non-state higher school in Zamość founded in 1997. The headquarters of the university is the Collegium Maius (in Akademicka Street) located in the old Former Seminary which was connected with activities of the Zamojska Academy.
